

FUJI FILM ELECTRONIC MATERIALS WINS INTEL'S PREFERRED QUALITY SUPPLIER AWARD

N. KINGSTOWN, Rhode Island, March 21, 2006 -- Fuji Film Electronic Materials was named a recipient of Intel Corporation's Preferred Quality Supplier (PQS) award for outstanding performance in providing products and services deemed essential to Intel's success. The company was awarded for its efforts in supplying Intel with advanced materials and wet chemistry and equipment for semiconductor manufacturing. Fuji Film Electronic Materials and 25 additional PQS award winners will be honored at a celebration in Burlingame, California on March 21.

"Fuji Film Electronic Materials is grateful to receive this highly selective recognition from Intel," said Philippe Gouby, President, Fuji Film Electronic Materials U.S.A., Inc. "This award recognizes the highest quality and most reliable suppliers to the semiconductor industry and we are proud to again be among the few recipients. This award resulted from the successful partnership between the employees of Intel and of Fuji Film Electronic Materials."

"FFEM embodies all the characteristics of a Preferred Quality Supplier, driving proactive technology and quality improvements that consistently exceed Intel's expectations," said Cari Shim, Director of Intel's Fab Materials Operation.

The PQS awards are part of Intel's Supplier Continuous Improvement (SCQI) process that encourages suppliers to strive for excellence and continuous improvement. To qualify for PQS status, suppliers must score 80 percent on a report card that assesses performance and ability to meet cost, quality, availability, delivery, technology and responsiveness goals. Suppliers must also manage and deliver on a challenging improvement plan and a quality systems assessment. Additional information about the SCQI program is available at <http://supplier.intel.com/quality>.

Intel will also recognize PQS award winners on March 21, 2006 with an advertisement in the U.S., Europe and Asian editions of The Wall Street Journal.

About Fuji Film Electronic Materials

Fuji Film Electronic Materials is a wholly owned subsidiary of FUJI Photo Film Co. Ltd, with regional headquarters in the Japan, United States and Belgium and with leading edge manufacturing and R&D facilities around the world. The company supplies high technology chemistry and equipment to the semiconductor fabrication market place.
